

# SR-2020

SOLAR AND WIRED SYSTEM

DRIVE SAFETY

*your***safety**eyes

Completely new, this intelligent system, using solar panels, presents an innovator intern prismatic reflection (RPI) that allows unique perception levels. Using bright LED's together with this innovative system (RPI), SR-2020 offers an unique and surprising level of effectiveness in road safety.

**Technical Features:**

- Powered by solar or by wired system
- Ultra bright leds with chromatic calibration and several colors
- Visibility up to 1 Km
- Possibility of always on, intermittent and sequential light
- Possibility to connect n elements
- Material: Aluminium and polycarbonat
- LEDs: 5mm / 15° / with chromatic calibration
- Battery NI-MH: 1,2Vdc/2100mA or Capacitor: 2,3Vdc/120F
- High performance photovoltaic
- Light detector system
- Battery autonomy (after full charge): 120 hours
- Capacitor autonomy: 18 hours min (Always on mode)  
48 hours max (Flashing mode)
